Company

LEADING INTERIOR
SHUTTERS
MANUFACTURING
COMPANY

The Traditional Shutter Company is a manufacturing company specialising in the production, distribution and installation of high quality hand crafted traditional and modern design shutters. We pride ourselves with offering our customers exceptional products delivered to perfection. The Traditional Shutter Company emerged as a professional response to the demand for quality shutter providers for both the UK and European markets.

Bringing creativity and consistent strive for perfection in every detail is our motto. As a manufacturer we have the capacity to deliver individually tailored interior shutter solutions to meet the highest customer expectations and specific needs. Our creative and flexible management is able to respond to the most specific customer requirements.

Benefiting from our own modern joinery facilities we are able to go beyond the typical limitations and glitches of the manufacturing process and deliver interior shutters to the highest possible standards.

The Traditional Shutter Company benefits from its own manufacturing facility, high quality material sources and professional workforce. We guarantee on-time and successful completion at all times by offering precise planning with bespoke quality and professional fitting.

We chose to establish our manufacturing facilities in Bulgaria because of the exceptional quality of the local wood sources, the skills and dedication of the local workers as well as the low production costs. The country has great traditions in woodworking and is worldwide recognized for its craftsmen, suitably located in Europe it provides our clients with average delivery time of four weeks. This allows us to supply unique interior shutters solutions with outstanding quality and great value.

The Traditional Shutter Company offers diverse range of material, colour and finish options.

We provide colour matching to any shade of paint colour charts as we always strive to meet our customers' specifications.

All shutters paint work is carried out using water-based paints – environmental alternative to oil-based colouring systems. We really care about the environment and all manufacturing processes are in compliance with the established international regulations. For our coloured wood shutters models we use only lime wood.

We offer custom finish on all orders. Painted, oiled, lacquered or simply left natural we will deliver a bespoke product to the highest established industry standards.
